Lannion, France - overGame Studio is thrilled to announce the release of its latest title, "Recycle Bin Battle," on Xbox and Steam on May 14, 2025. This unique arcade and puzzle game combines three distinct gameplay mechanics to offer an engaging and challenging experience.

About "Recycle Bin Battle"

"Recycle Bin Battle" is set in a near future where humanity has exploited 98% of Earth's resources. Facing an extraterrestrial threat, humans must use their last resources to create a weapon powered by recycled waste: the Recycle Bin Weapon. The game stands out with its innovative approach and strong ecological message.

Story and Inspiration

The story of "Recycle Bin Battle" is deeply connected to the personal experiences of Yuri Terdik, the game's lead developer. After losing his parents in an industrial accident, Yuri dedicated his life to raising awareness about the dangers of overconsumption and pollution. The game serves as a tribute to his family and a call to action for a more sustainable future.

Gameplay Principles

- **Match-3 Combo:** Players sort waste items falling from a machine, arranging them by type and color to create combos and form balls for the next phase.
- **Breakout:** Use the created balls to break through invaders' defenses and gain energy.
- **Arcade Shooter:** Use the collected energy to shoot down Kaiju (giant monsters) from space and save humanity.

Unique Features

- **Originality:** "Recycle Bin Battle" stands out with its original concept and immersive Japanese atmosphere, made possible through collaboration with Yosuke Takahashi, creator of Gaijin Charenji 1: Kiss or Kill.
- **Ecological Message:** The game raises awareness about overconsumption and the importance of recycling through engaging gameplay.

- **Game Modes:** The game offers various modes, including arcade, story, time attack, and score attack, providing a diverse experience for all types of players.
